

Offsite Data Storage

With digital data becoming more and more important each day, making sure you have access to the data in the event of a disaster is most important. A & M Digital Technologies is here to offer offsite data storage for your home or business.

We can take any of your digital data, be it server or system backups, hardware restore discs, or just data backups we can store it all. We can setup a system onsite to ensure data backup is occurring in case of a hardware failure, and we can also take critical data and make copies to store offsite in case of a disaster strikes. Please call us for details to see which services we can offer to help benefit you the most.
